

AI Vision Embedded Server

Overview

Powered by AMD EPYC™ Embedded 8004 (Siena) series processors, the system delivers up to 64 cores and 128 threads, enabling efficient real-time analytics, AI inference, and large-scale data processing at the edge. At the edge, IoT and mobile devices use embedded processors to collect data. This accelerates the AI pipeline, enabling real-time decision-making and.

May 5, 2026 – Natick, MA – Cognex Corporation (NASDAQ: CGNX), the global technology leader in industrial machine vision, today announced the launch of the In-Sight® 3900 Vision System. Built on a new generation of Cognex embedded AI vision technology and powered by Qualcomm Dragonwing™ platforms. Embedded vision computing impacts how devices interpret and interact with their environment. By integrating advanced machine learning algorithms directly into edge devices, such as cameras, drones or industrial sensors, these systems can process visual data locally without relying on cloud. Advantech now offers the most advanced edge AI platform built on the full spectrum of NVIDIA technologies—from the latest NVIDIA Jetson Thor™ for powerful humanoid robotics, to Jetson Orin™ with Supermode for ultra-efficient edge inference, and NVIDIA IGX™ for safety-certified, deterministic AI in. Edge AI enables more intelligent, responsive, and efficient systems that can handle complex video data processing tasks autonomously. iENSO's Embedded Vision Camera platform is designed for AI compute at the edge with Ambarella's advanced CVflow® AI engine that scales to trillions of operations per. We categorize embedded vision systems into two types: flexible embedded AI vision systems and ultra-embedded AI vision systems. While not inherently focused on.

Our approach to advertising and expanding access to

OpenAI plans to test advertising in the U.S. for ChatGPT's free and Go tiers to expand affordable access to AI worldwide, while protecting privacy,

Synetic Debuts LYNX Computer Vision SDK at the 2026 Embedded Vision ...

New SDK helps teams add real-time vision capabilities to robotics, industrial automation, security and edge AI systems with faster deployment, flexible integration and continuous model

Microsoft Build 2025: The age of AI agents and building

This emerging vision of the internet is an open agentic web, where AI agents make decisions and perform tasks on behalf of users or organizations. At

From Near-Sensor to In-Sensor: A State-of-the-Art

Ultimately, this article provides insights into the evolving landscape of embedded AI vision systems and suggests new research directions for the

Qualcomm's IE-IoT Expansion Is Complete: Edge AI

Qualcomm Technologies is redefining its Industrial and Embedded IoT (IE-IoT) business to become a leading provider of edge compute and AI solutions

Renesas Completes Acquisition of Irida Labs to Expand Vision AI ...

The acquisition strengthens Renesas' edge AI embedded processing offerings, a key secular growth area for Renesas. It also enables system-level solutions that integrate physical AI and

Edge Computing Solutions For Enterprise | NVIDIA

Train, build, deploy, and scale vision AI applications from edge to cloud with NVIDIA Metropolis, unlocking valuable insights for spaces, including retail, warehouses, and cities. Bring visual data and

VeriSilicon Launches ISP9000: The Next-generation AI-embedded

Deliver superior results in extremely low-light conditions, surpassing conventional computer vision technologies Shanghai, China, April 2, 2025-VeriSilicon (688521.SH) today unveiled

USB Camera vs IP Camera Integration: What Embedded Vision

Vadzo Imaging's Falcon USB camera series and Innova GigE camera series deliver purpose-matched embedded vision camera solutions for the USB Camera vs IP Camera integration

Embedded Vision

By integrating advanced machine learning algorithms directly into edge devices, such as cameras, drones or industrial sensors, these systems can process visual data locally without relying on cloud

Scalable, PC-Free AI Inspection with Cognex In-Sight 3900

Cognex Corporation has launched the In-Sight 3900 vision system, an embedded AI vision solution that is designed to deliver high-speed, high-accuracy inspections directly on

Microsoft - AI, Cloud, Productivity, Computing, Gaming

Accessible AI starts with language Microsoft is working on seven projects to help more people use AI in their native tongues—for health, education, work, and more.

Azure Vision in Foundry Tools | Microsoft Azure

Unlock insights with Azure Vision in Foundry Tools (formerly Azure AI Vision). Use computer vision, image analysis, and OCR to power intelligent applications.

Cognex Launches Highest Performance Embedded AI Vision System

By combining Cognex-developed Edge AI, Advanced AI, and rule-based vision tools with a high-performance embedded compute, the system enables deterministic, real-time inspections at

ADLINK launches edge AI servers targeting vision processing and on

ADLINK positions the new platforms for high-end, real-time vision processing and on-site inference for large models. It also points to mixed workloads that combine visual, language and

Edge AI for Embedded Vision Solutions

Add Edge AI to your embedded visions system enables more intelligent, responsive, and efficient systems that can handle complex video data processing tasks

ES1002 Edge AI Server Powers Next-Gen AI with AMD EPYC™

IBASE unveils ES1002 Edge AI Server with AMD EPYC™ Embedded 8004, 576GB ECC DDR5, PCIe Gen5 and dual 10GbE for Edge AI applications.

Edge AI Systems

With support for both embedded and server-class deployments, Advantech enables customers to simulate, train, and infer at the edge—driving next-generation AI

NVIDIA GTC San Jose 2026 Session Catalog

Browse the GTC 2026 Session Catalog for tailored AI content. March 16-19 in San Jose to explore technical deep dives, business strategy, and industry insights.

Ambarella Showcases CV7 Edge AI Vision SoC at CES

Ambarella, Inc. is highlighting its CV7 edge AI vision system-on-chip (SoC) at CES 2026. The solution is built for a variety of AI applications including
