

B1ale Distribution Box Dimensions

Overview

It describes HA, HK, and LGD series boxes with dimensions ranging from 100-415mm in length, 105-323mm in width, and 75-140mm in height. The bale arm container — also known in the market as a Maxinest-style crate — is a stack-nest distribution box with rotating support arms that enable both rigid stacking and deep nesting. Originally developed for UK grocery and retail distribution, these crates have become a European standard for. These bale arm bins are often used for order picking and both internal and external distribution. They are made from HDPE and feature particularly straight walls, making them excellent for nesting. Actual units use PNP status indicator, NPN status indicator, or neither. Dimensions are shown in mm (in. It also provides specifications for MB-ABC, MB-AF, MB-AS, and MB-LF series boxes, listing their lengths, widths, heights, and the number of ways (outlets) they.
