

Burkina Faso implements smart fiber optic patch cords

Overview

The “SMART Burkina” project - intended to interconnect the cities of Burkina Faso through a network of 800 km of optical fiber and to guarantee the safety of the citizens of Ouagadougou and Bobo-Dioulasso thanks to 900 urban surveillance cameras - was launched Thursday July 8. The “SMART Burkina” project - intended to interconnect the cities of Burkina Faso through a network of 800 km of optical fiber and to guarantee the safety of the citizens of Ouagadougou and Bobo-Dioulasso thanks to 900 urban surveillance cameras - was launched Thursday July 8. The “SMART Burkina” project - intended to interconnect the cities of Burkina Faso through a network of 800 km of optical fiber and to guarantee the safety of the citizens of Ouagadougou and Bobo-Dioulasso thanks to 900 urban surveillance cameras - was launched Thursday July 8 by Prime Minister. The Ministry for the Development of the Digital Economy and Posts (MDENP) of Burkina Faso has entrusted Sofrecom with the task of supervising and controlling the deployment of the Ouaga-Pô fibre optic backbone network (FOOP) as part of the Regional Communication Infrastructure Project for West. The government of Burkina Faso unveiled a plan to make ICT a tool for the security of its population. To handle the growing criminality in the country, it has called on China to help in this task. “SMART Burkina” - launched last July 8 by Prime Minister Christophe Joseph Marie Dabiré- is the name. The government of Burkino Faso has chosen Telecel Faso's new subsidiary Bridge Fiber Solutions (BFS) to operate and maintain the country's fibre optic backbone network. Spanning 3000km and connecting nearly 100 municipalities across all 13 regions, Burkina Faso's fibre optic network also has. Recently, the smart Burkina Faso project, which was financed by the Export-Import Bank of China and jointly undertaken by Huawei Technologies Co. and China Communications Construction Group Co. This has laid a solid foundat...
