

Can goods be stored under a fire-fighting electrical distribution box

Overview

Where a small enclosure is used to house electrical distribution equipment, it should be noted that it was designed purely for that purpose and should not be used for the storage of any other product, and critically, not any materials that could be combustible. With the introduction of the 15th Edition of the IEE Wiring Regulations in 1981 the UK aligned the requirements of the regulations with the International Electrotechnical Commission (IEC) worldwide electrical installation standard IEC 60364. This has previously mentioned on electrical reports but more due to accessibility regulations. While on site the other day a carpenter turned up to price boxing in. In 2004 (England and Wales) fire and rescue services attended over 33,400 fires in non-domestic buildings. These fires killed 38 people and injured over 1,300. In 2004, the costs as a consequence. rehouse within other non-industrial buildings. This Guidelines shall supersede the "Guidelines on r storing various types of goods or materials. It also includes warehouses for storing chemicals (to comply with the Chemical Warehouse requirements), resh/perishable food products (cold room), etc.

Article Content
