

Composition of the Portuguese optical cable junction box

Overview

The optical cable junction box comprises a box body (1), a box base (2), a wire inlet device (201), a wire outlet device (202) and cover plates (4 and 5). The invention relates to the field of optical cable optical fibers, and provides an optical cable junction box. Compact Boxes Optical cable splice boxes protect the splicing parts of optical. EWMJ joint boxes are specially designed to provide the maximum versatility for OPGW cable splicing, which enables their use in OPGW and other optical cable systems. It connects trunk cables like OPGW to patch panels in control rooms. The junction box supports, organizes, and protects. Communication Optical Cable Cross Connecting Cabinet is the interface equipment suitable for the exchanging between trunk optical cable and optical distribution cable. It can be mounted both floor and aerial modes.
