

Construction of a telecommunications data center in Guyana

Overview

In a bold step toward shaping the future of technology in South America and the Caribbean, the Government of the Co-operative Republic of Guyana (Guyana) and Cerebras Systems have signed a landmark Memorandum of Understanding (MOU) to build and operate a state-of-the-art. In a bold step toward shaping the future of technology in South America and the Caribbean, the Government of the Co-operative Republic of Guyana (Guyana) and Cerebras Systems have signed a landmark Memorandum of Understanding (MOU) to build and operate a state-of-the-art. AI chip company Cerebras is to develop a large data center in the South American country of Guyana. As this South American country continues to embrace digital transformation, the demand for robust data centers is at an all-time high. The telecommunications market is anticipated to grow based on demand from oil and gas, a growing migrant population, and the development of call. Guyana's plan to host a new artificial intelligence (AI) data center could require as much as 100 megawatts (MW) of electricity. The terms are part of a memorandum of understanding (MoU) signed with U. -based Cerebras Systems, the. GEORGETOWN, Guyana — Guyana and U.
