

Cost per kilometer of optical fiber cable installation

Overview

A practical frame is \$40,000–\$350,000 per km, with a common mid-range around \$120,000–\$180,000 per km for standard single-mode fibre in ducted runs. Per-unit considerations include \$/km for total project, \$/duct meter for ducting work, and \$/splice for termination. Fiber-optic cable materials typically cost \$1 to \$6 per linear foot, depending on fiber count and cable type. Commercial building installations with 100-200 network drops generally range from \$15,000 to \$30,000. The price experience varies with splice work, cable type, and right-of-way costs. This article provides practical USD ranges and breakdowns to help. Buying fiber optic installation services involves several cost components, with total price influenced by length, location, and access. The installation type you choose and the layout of your property determine the total labor and materials needed for your project. You should account for permit.
