Discover how evolving regulations and solar adoption. The 2021 Distributed Energy Law (Law 10086) provides a strong legal framework for self-generation, grid interconnection, and net billing, positioning the country as a regional leader in consumer-based renewable energy. However, controversial tariffs introduced in 2023 temporarily slowed growth. In 2016, the Costa Rican government approved a new regulation which allows individuals and companies to produce solar energy (up to 15 percent of the users per district) and sell up to 49 percent of their excess production back to the grid. A new distribution law from 2021 established conditions to.
