

Distance between indoor electrical distribution box and fire extinguisher box

Overview

Requirements vary by fire class: Class A (Ordinary Hazards): Maximum 75-foot travel distance. Class B (Flammable Liquids): 30 to 50 feet, depending on the hazard volume. Extinguishers are broken down into the following ratings: RELATED: Read more about Class K fire extinguishers The distribution of portable fire extinguishers is a balance between having an extinguisher nearby when you need. To put it plainly, NFPA 10 mandates specific maximum travel distances to portable fire extinguishers based on the type of hazard present. Learn what OSHA means by "readily accessible" and how clearance, mounting height, and travel distance rules apply to fire extinguishers. 157 requires only that extinguishers be "readily. Within the United States, the two most authoritative figures on fire safety are the National Fire Protection Association (NFPA) and the Occupational Health and Safety Association (OSHA).
