

Distribution box ac-xfb

Overview

It is capable of delivering up to 750 W in a 268 mm x 127 mm x 40.4 mm package, with up to 12 isolated outputs using single or dual powerMod output modules ranging from 1 to 58 V. Outputs can be parallel connected for higher currents and series connected for higher voltages up to 348. Our AC distribution boxes are equipped with the true AC breaker and AC SPD from 220V-400V. Within a durable PC enclosure, we pre-assemble reliable AC components to reduce working time and error susceptibility, thereby improving the system operations of your end-users significantly. The safe supply from multiple sources such as shore power, generator and inverter to each of the electrical consumers is controlled and the unit functions as the central location for circuit breakers within the AC. The XFB series AC-DC configurable power supplies provide six slots that accept intelligent DC-DC converter modules. The ACDB receives AC power from solar inverter and directs it to AC loads. Also, please take a look at the list of 17 ac distribution box manufacturers and their company rankings.
