

E2000rm Fiber Optic Connector

Overview

The E-2000® connector, invented by DIAMOND, delivers unmatched reliability and precision in fiber-optic interconnects - making it the ideal choice for critical transmission points across telecom, industrial, medical, and more applications. By checking this box I confirm that I have read the Privacy. The E-2000 is an optical fiber plug connector with push-pull locking mechanism and a self-closing dust protection flap. Variants: E-2000 /PC and E-2000 /APC. Combined with R&M's quality requirements for raw materials, design, and workmanship, it guarantees the most stable transmission performance over the entire 25-year system warranty. Diamond has responded to this challenge and expanded the E-2000™ connector system to address these igin, etc. The thumb-latch and frame a ava ble in eight di nct c rs: ge (Wh in multiple-service patch facilities. The E-2000™ system. The E-2000™ Connector offers a spring-loaded shutter mechanism that protects the ferrule end-face from scratches and dust while locking out potentially eye damaging laser radiation. Although E2000 is rather expensive than most of the other types fiber.
