

Features of EU Distribution Boxes

Overview

The European-style cable distribution box is a cable-based engineering equipment widely used in power distribution network systems in recent years. According to low tension directive 2014/35/EU. Surface enclosures with a capacity of 4, 6, 8, 12, 18, 24, 36 and 54 modules with transparent window. Halogen-free plastic materials. Base and frame: ABS RAL 7035 grey. Transparent window: PC tinted window, with UV protection. A cabinet that supports both surface mount electrical enclosure use and flush mount electrical enclosure use reduces inventory complexity, simplifies decision-making, and adapts more easily to different wall conditions. It is compact and features a clear. In the evolving landscape of urban power distribution, the transition from overhead lines to underground cable networks has mandated the use of high-performance Cable Distribution Boxes (also known as Cable Junction Boxes).
