

Fft-410 Fiber Optic Sensor

Overview

Hall Sensor Fft-410-Q Smooth Fibre Head 4mm Fibre Optic Sensor Thru-Beam Reflection Ir Sensors PANASONIC Fiber Optic Sensor, Through Beam, Threaded Type, 1. 13 m □Features□It has strong anti-interference ability, fine diameter, soft quality and light weight. F&C Sensing Technology (Hunan)Co.,Ltd is specialized in the R&D, production and sales of automation control sensors. We have more than 5000 types of sensors and have more than 10 years OEM experience for Germany, Korean, France and US famous brand. Our sensors used on the labelling machine, vibratory feeding bowl, screwdriver, glue machine, waste and recycling truck. FS-N13 Dual Digital Fiber Optic Amplifier HD LED dual digital display to master well even subtle changes These are reliable and easy-to-use devices that have high power, can automatically adjust to real-time conditions, and have a straightforward display that eliminates any guesswork. FFT-410 M4 Thread Head Through-beam optic fibre sensorOptic fiber sensor Features:Fiber optic sensors used for tiny object detection, including both metal and non-metallic items, plastic objects, semi-transparent objects., it just like a photoelectric switch, featured as high precise and small volume, especially suitable for any application in very limited mounting space.
