

Fiber optic communication to homes in Ethiopia

Overview

Key Insight: Ethiopia's fiber optic coverage is projected to reach 45% by 2026, primarily expanding in major urban centers like Addis Ababa and Dire Dawa. Safaricom Telecommunications Ethiopia has commenced the installation of a new fibre optic network connecting Afdera to Mekelle, a move designed to bolster network resilience and accommodate increasing data needs in the region. The project was officially launched in a ceremony attended by officials. Enlisted are the most preferred ISPs in the country with a closer look at the coverage, affordability, customer reviews, installation requirements, and contacts. Connecting to a reliable internet is the first step towards a good online experience. Frehiwot Tamru, the CEO of Ethio Telecom, presented the new service to media professionals. Ethio Telecom officially launched its "Copper Switch-Off Initiative," which aims to migrate 100,000 customers from the existing copper network to high-speed fiber optic infrastructure by the end of this fiscal year.
