

# Finished elbows for 200 cable trays

## Overview

This project presents a 3D model of a vertical cable tray elbow designed for 200×42 mm cable trays, compatible with the BAKS “Cable Trays - H42” system. with the same or different width of the cable run. All fittings are available in sizes and types corresponding to the straight cable tray sections. These fitting are including: elbow, horizontal cross, vertical inside riser, reducers, cover clip, joint connector, horizontal cable tray tee, horizo. Metal elbows for cable trays are specialized components designed for electrical installations, allowing for efficient and safe routing of cable pathways at corners. It is ideal for industrial and commercial applications where large cable loads require structured routing without compromising cable. The 45° Vertical Elbow is the perfect solution for installations that require the use of large diameter cables in long span situations. This elbow effectively narrows the tray width while seamlessly connecting straight sections and fittings for a flawless transition. Class 1: Designed for use with.
