

# HP Core Switch PoE Light Alarm

## Overview

If the PoE Status LED is flashing, that indicates a problem with the delivery of PoE power out one or more switch ports. Press the LED Mode button to put the switch into PoE mode and the port LEDs will show which ports are experiencing the problem. So I was poking around through my HP POE stack and just backing up the config file as we are getting ready to move in a few months and I noticed on the status bar below: Does anybody know what this alert is?

I was trying to find out via google / bing and have not found anything. The switch is. Switch 5412zl - Alarm FAULT + POE Alert flashing nous avons le voyant « Fault » qui est allumé sur un Procurve Switch 5412zl dans notre salle serveur. Le Voyant POE est allumé et clignote. Enterprise Networking Design, Support, and Discussion. Switch Model: 5412Rzl2 (J9851A) Had. Hello everyone, I am currently working with a HP Procurve 5400 switch and have a PoE error light blinking orange, i have pulled each blade and reseated all but the light is still blinking. The following tables identify the specific. Having 10+ HP 2530 24&48 port PoE+ switches, all with the same issue. After 2 seconds: led goes off.
