

# How many meters away is the distribution box

## Overview

When fused installed in the wall, the bottom is 1. Distribution box and switch box should not exceed 30 meters. Generally, distribution boxes can be divided into three levels of secondary protection, that is, three levels of distribution boxes: general. The bottom edge of the distribution box is usually between 1.8 meters above the ground, which is convenient for operation and inspection. It is always best to get a qualified electrician to perform any electrical work you may need. Please be cautious of any information you may. In this video, we explain everything about the Distribution Box (DB Box) — its recommended gauge, ideal size, and how many electrical pipes it can accommodate. more. If cables are concealed they are going to need 30mA Rcd protection unless they are protected by earthed metal or earthed swa so that will not comply with 17th. You also will need an 80 amp switchfuse if its a 100 amp supply so if there is a problem your fuse will go before supply fuse. It takes the incoming power and safely distributes it to different circuits throughout your building.
