

Huawei MA5671 Optical Module Information

Overview

The SmartAX MA5671 provides these interface parameters: PON Port • Port type: SC/UPC • Transmission rate: GPON: downstream 2.244 Gbit/s • Bi-directional FEC Electrical GE Port • Port type: RJ-45 • Autonegotiation between 10/100/1000 Mbit/s • Ethernet. SmartAX MA5671: Access product manuals, HedEx documents, product images and visio stencils. The MA5671 Multi-service Access Module is an indoor optical network unit (ONU) developed for small office and home office (SOHO), small- and medium-sized enterprise (SME), and corporation users. It has a neat. OptiXstar MA5671A is a mini plug-and-play Passive Optical Network (PON) access device an Optical Network Unit (ONU) that supports one-stop deployment, even achievable offline when using Gigabit-capable Passive Optical Network (GPON) upstream transmission. Once deployed, OptiXstar MA5671A. The MA5671A is a SFP ONU developed by Huawei. In the downstream direction, the MA5671A connects to a switch or router through a GE port to provide the high-speed Internet (HSI) and VoIP services; in the upstream direction, the MA5671A connects to an OLT through a GPON port The SFP Fiber Module. The MA5671 multi-service access device is an ONU designed for SOHO and SME users. It is mainly used in FTTO and video surveillance scenarios.
