

IR on the distribution box

Overview

An infra-red (IR) distribution block, IR eye, and IR emitters allow you to control older audio equipment hidden in cabinets with your IR remote. Infrared light transmission has been the standard for line-of-sight type A/V remote controls since the early 1980s. IR transmitters use near-infrared light which is just below the visible spectrum [Factoid: remote control IR transmitted signals can be seen with digital cameras and camcorders as. The Remote Control Blaster Repeater Kit contains all equipment necessary to remotely operate 4 components (expandable to 12 components) using your standard remote control. Mount the IR receiver in a central location and connect to the IR Distribution Block. This is accomplished by pointing the IR remote at any. I have an Onkyo TX-SR313 receiver and a Pace DC758D cable box in an equipment closet 50' away from the TV. The cable box is connected to the receiver via HDMI and the receiver outputs HDMI over Cat 6 a TV via a Monoprice HDMI Over CAT6 Extender Wall Plate w/ Built-in Backward IR Channel (PN 8008).
