

# Indicator lights on the fiber optic terminal box

## Overview

This white box connects to a fibre-optic cable that runs directly to your property and gives you access to our fibre broadband and voice services. The ONT has several lights on the front. When these lights change colour or start flashing, it usually means something is happening with. This guide is designed to offer an explanation of the lights seen on the most common Full-Fibre (FTTP) modems fitted by Openreach - sometimes called an ONT. If you are a Freeola Full Fibre Broadband customer you will have an Openreach modem. The Optical Network Terminal (ONT) is a crucial device in modern telecommunications, serving as the interface between your home network and the fiber-optic internet connection provided by your Internet Service Provider (ISP). One of the key aspects of the ONT is the array of lights on its front. Underneath the box, from left to right, are 3 connectors - power, LAN out, optical fibre in, That middle one is the one that goes to your router. Different service providers in South Africa use slightly different ONT models, but the basic. Learn what each light on your fiber equipment means—from power and fiber signal to Ethernet and phone service—and how to quickly troubleshoot issues.
