

Installation of cable trays and process pipe racks

Overview

When cable trays are installed together with process pipe racks, the cable trays should be arranged on one side of the pipe rack. If unavoidable, the distance. A pipe rack is the main artery of a processing unit. Pipe racks carry process, and. This method statement covers the site installation of the cable tray & ladders and the requirements of checks to be carried out. This section will guide you through the necessary steps to ensure a successful. Pipe rack modules are pre-loaded pipe racks and provide the necessary infrastructure to support pipes, power cables, and other equipment. These steel structures are widely used in industrial projects such as oil and gas refineries, electrical and petrochemical plants, and nuclear power plants. ErectaRack's pre-engineered pipe racks significantly reduces the lengthy engineering and fabrication process typically required for pipe rack assembly by doing the engineering up-front.
