Integrated Cabling Fiber Optic Cable Junction Box

Overview

This 12 port fiber access terminal box is designed to connect feeder cables to subscriber drop cables for FTTH last-mile fiber connectivity. It integrates fiber splicing, optical signal splitting, termination and cable management into a compact enclosure for indoor and outdoor. In conjunction with the mounting adapters, JUNG also offers the colour-coded Keystone modules for fibre optic cables with SC couplings, which enable the quick and safe installation of fibre optic connections. Thanks to the colour coding, they can be easily distinguished and used specifically for. With the increasing digitization and requirement for high-speed networking, the Bartec Technor junction boxes for fiber optic signals performs dependably in the harshest of environments. Applying our proven design found in the TNCN product line, we are able to provide long-term highspeed junctions. The GZR Series 19" Rack-mounted Terminal Box (Rail-based) is a functional component for optical fibre distribution frames or network integrated cabinets, offering fibre splicing, distribution, and tray storage. Thanks to its flexible connection options, the box is suitable for up to 4x LC duplex or 4x SC simplex.
