

Is the HTB1100S fiber optic transceiver multimode

Overview

The biggest highlight of htb-1100s is its "dual-fiber multi-mode" design. compared with single-fiber equipment, dual-fiber does not interfere with each other in data transmission and reception, which greatly improves the stability of data transmission. especially in high-load. Description netLINK Series Fiber Media Converter is the conversion equipment of Ethernet optical-electronic signals between 10/100M UTP interface (TX) and 100M Fiber interface (F X). The. HTB -1100 is 10/100M adaptive fast Ethernet optical transceiver. It can achieve two different twisted-pair cable and optical fiber transmission medium of transformation, relay base - TX 10/100 and 100 base - FX two different network segments, can satisfy the long distance, high speed and high. Lhgd htb-1100s 100mbps multimode dual fiber optic transceiver, supporting dual fiber transmission and efficient, stable photoelectric conversion, is suitable for small and medium-sized enterprises, data centers, and network engineering deploymentsSmall appearance is easy to install, strong. The NetLINK HTB-1100S 10/100M Fiber Optic Media Converter is a reliable networking device designed to bridge the gap between traditional copper Ethernet networks and high-speed fiber optic infrastructure. This compact and efficient device converts electrical Ethernet signals transmitted over. Netlink 100 Gigabit Single-Mode Dual-Fiber Transceiver HTB-1100S-25KM is a high-performance fiber optic solution designed for long-distance, high-speed data transmission.
