

Lithuanian Air-Cooled Switch OSFP

Overview

The switches use Twin port OSFP cages supporting two transceiver engines in a single OSFP form-factor plug creating 800Gb/s electrical to the switch and 2x400G optics using two MPO-12/APC optical connectors. This article examines the key differences between OSFP-IHS and OSFP-RHS to help guide informed decisions. In this design, the heat. The OSFP (Octal Small Form Factor Pluggable) form factor has emerged as a leading choice for next-generation 800G and 1. This article explores how OSFP transceivers deliver high-density, high-speed connectivity and how FS helps customers transition smoothly. Cofan's air-cooled OSFP thermal modules are engineered to meet the growing thermal demands of next-generation AI servers and high-speed telecommunications infrastructure. The line rate is 400Gb/s for both 400GbE Ethernet and NDR InfiniBand based on the 100G-PAM4 modulation.
