

Monitoring Aggregation Switch

Overview

TRENDnet's 8-Port Gigabit EdgeSmart PoE+ Switch, model TPE-TG82ES, is a cost-effective desktop PoE managed switch solution for high-speed gigabit PoE+ applications. This EdgeSmart switch features the most commonly used managed switch features, reducing unnecessary switch. The Catalyst Center Power over Ethernet (PoE) enables you to monitor the PoE-capable devices in your network. It also monitors the power summary of switches supplying PoE, which provides information such as a switch's power budget, used power, remaining power, and power usage. 5Gbps data over UTP cables, designed for the demand of high-bandwidth required network equipment, such as Wi-Fi 6 802. Support static link aggregation. QoS is used to allocate bandwidth to different services so as to. EdgeSmart network management provides an easy-to-use web-based management interface for reduced switch configuration complexity and offers a combination of more commonly used SMB management features for easy deployment.
