

Nordic underground optical cable

Overview

IOEMA is a state-of-the-art, high-capacity, 1400 km repeatered submarine fibre optic project that will arc across five key northern European markets: the UK, The Netherlands, Germany, Denmark and Norway, supporting critical infrastructure security with full armoured and burial. "In terms of connectivity, Norway used to be the final stop on the European network system. Over the past five years or so, the tables have turned completely - now we are. The Polar Connect is a Northern European initiative to obtain secure and resilient connectivity through the Arctic to Asia and North America for Research, Development, Innovation and Education. Behind the report are the Nordic National Research & Education Networks (NRENs). Baltic Offshore have completed all submarine fiber optical cable installations in Global Connects investment in a new digital highway, Aurora. Baltic Offshore installed the cables between Sassnitz-Bornholm-Simrishamn, Bornholm-Öland-Gotland, as well as increased the capacity in the route between.

Article Content

Polar Connect

The project is part of the Polar Connect initiative, where the long-term plan is to connect the Nordic region with Japan and South Korea through a fiber optic cable under the Arctic Ocean,

The Subsea Cable Connecting Europe: Tampnet

Tampnet Carrier commissioned over 700 km of brand-new fiber optic cable to enhance routes connecting the UK to Europe via the Nordics. Tampnet

Aurora submarine fiber optic cable installation projects

Baltic Offshore installed the cables between Sassnitz-Bornholm-Simrishamn, Bornholm-Öland-Gotland, as well as increased the capacity in the

Underground Fiber Optic Cable Installation:

Explore the process and benefits of underground fiber optic cable installation. Learn how this infrastructure investment can elevate your internet

The COBRA Fibre Optic Cable – a new high capacity fibre ...

The interconnection between Denmark and the Netherlands has now been officially launched; in addition to power transmission, the submarine cable also provides a brand new low

Built-in resilience for Arctic subsea cables

Subsea cables with dedicated sensors will provide continuous data and thereby take Arctic research to an entirely new level.” Combining cable

Arctic data cable linking Europe to Japan secures first investment

A plan to build the first fibre-optic cable across the Arctic has secured its first investment, the consortium behind the 1.1 billion euro (\$1.15 billion) scheme said on Friday.

Built-in resilience for Arctic subsea cables

With state-of-the-art fibre sensing technology, the two cables proposed to connect Northern Europe to Asia and North America will contribute to

New large submarine cable in the Baltic Sea comes with

A total of 2,500 kilometres of fibre-optic cable will be rolled out from Luleå in northern Sweden down over Bornholm and further down to Berlin in

Optical Connections

Sweden's Eastern Light has selected Ciena's GeoMesh solution to help meet what it says is "fast-growing demand" for long-haul dark fibre in the region. Eastern Light is building a series of

A Resilient Submarine Cable System through the Arctic equipped with

In order to realise the ambitious, innovative, and realistic Vision 2030, the plan is to create two independently routed submarine cables between the Northern part of the European Nordics and

Eastern Light | Baltic Sea Optical Expressway

Eastern Light is currently operating, building and planning a series of fiber-optic cable routes in the Nordics, with the purpose of meeting the fast-growing demand for modern and effective long-haul

New subsea cable planned, connecting Norway,

IOEMA is a state-of-the-art, high-capacity, 1400 km repeatered submarine fibre optic project that will arc across five key northern European

Internet Infrastructure Map (2026)

Explore the physical backbone of the internet with our interactive map of undersea fiber optic cables, peering exchange points, and more.

Submarine Cable Map

TeleGeography's comprehensive and regularly updated interactive map of the world's major submarine cable systems and landing stations.

Submarine Cable Map 2023

New Builds Europe, Africa, and the Middle East These regions are all experiencing a surge in new submarine cables. Projects such as Equiano and 2Africa are

Underground Cable: Fiber Optics Technology Below Ground

Underground cable is a type of optical fiber cable that enables lightning-fast data transmission for internet, phone calls, and streaming services. However, our intention is not merely to define

Underground Fiber Optic Cable: Installation Guide

Guide to Underground Fiber Optic Cable Jun 12, 2025 In the digital age, underground fiber optic cable serve as the invisible arteries of global

Map: The World's Network of Submarine Cables

Satellites get all the glory, but 99% of the world's data actually flows through a vast network of fiber optic submarine cables.

New subsea fibre-optic cable to connect Ireland and

A new subsea cable system called Havhingsten will connect Ireland with the Nordics region and the UK, boosting network connectivity.

New large submarine cable in the Baltic Sea comes with

Bornholm is close to becoming a new Nordic hub for internet traffic, after GlobalConnect has just finished connecting Sweden and Denmark with a

Poles apart: Building the Arctic's first subsea cable

But despite the presence of 5G in one of the Earth's most remote locations, fiber connections in the region are much rarer. Subsea Internet cables,

New Submarine Fiber Cable Connects Northern Europe

The cable connects with vital transatlantic crossings at Havfrue (Denmark), Leif Erikson (Norway) and other planned Trans-Atlantic cables. The

A vision for two Arctic subsea cables

Subsea optical fibre cables are by far the cheapest and most effective solution for long-range transmission of large volumes of data. But while numerous

GlobalConnect completes Phase I of Nordic Wave

In March 2024, the company completed a 2,600 km fiber cable running from Northern Sweden to Berlin. The cable includes 700 km of subsea cable and

Top 12 Fiber Optic Cable Manufacturing Investors in the Nordics

Explore key fiber optic cable manufacturing investors like EQT Group and Hexatronic Group in the dynamic Nordic connectivity market.
