

OEM EPON Equipment SFP

Overview

EPON ONU SFP is an SFP package hot-swappable optical module with SC connector (compliant with IEEE802.3). Single-fiber bidirectional design, the upstream and downstream rate can reach up to 1. From the Central Office's (CO) Optical Line Terminal (OLT, with EPON SFP transceiver/module) a single strand of fiber goes out to a passive optical splitter where its signal is. OEM SFP modules are small form-factor pluggable (SFP) optical transceivers that are manufactured by original optical component suppliers but sold under the branding and part numbers of major networking equipment vendors such as Cisco, Arista, or Juniper. In essence, they are standard SFP modules. Deploy cost-effective and efficient Fiber-to-the-Home networks with our range of EPON (Ethernet Passive Optical Network) transceivers. 3ah standard to deliver symmetric bandwidth of 1. Factory-direct pricing, global shipping, OEM/ODM available.
