

Optical module orders are booked until the fourth quarter

Overview

Optical module giant Lumentum (LITE. US) announced that orders may be filled until 2028, and NVIDIA Corporation has invested \$2 billion to secure production capacity. Driven by the dual forces of increasing AI computing power demands and the evolution of network infrastructure towards higher bandwidth and lower energy consumption, the 'optical communications giant' \$Coherent (COHR. US)\$ delivered a better-than-expected earnings report. The financial results show. TradingKey - On May 6, ET, optical component supplier Coherent Corp (COHR) released its third-quarter fiscal results, with revenue and earnings per share beating Wall Street expectations across the board; however, its shares tumbled more than 16% at one point during the following day's trading and. Coherent conference call: Orders are booked until 2028; 1. 6T optical modules are ramping up. In 2026, the company plans to increase CPO - related production capacity by more than 50%, and orders have been scheduled until the fourth quarter of 2026. Institutional analysts expect that the company's CPO business will contribute significant revenue growth in 2026, becoming the second growth. More importantly, the midpoint of Q4 guidance stands at \$1. Its AI high-speed optical module production lines, in particular, are running 24/7 at full utilization.
