

Price of Drop Cable for Structured Cabling

Overview

Structured cabling cost per drop typically runs \$150 to \$350 or more in commercial settings. Open-wall pre-wire lowers the per-drop cost. Finished-wall retrofits. Important: Because every building has unique pathway challenges, ceiling types, and security requirements, a “per-drop” estimate is exactly that—an estimate. It is always wise to schedule a professional site walkthrough before finalizing your budget. Here's the actual math on three common job. This estimator was built by TSS USA's project management team using real pricing data from hundreds of commercial cabling projects across Florida. The long answer, plus actual price ranges and money-saving tips, is below. This makes it easier to compare bids and understand where your budget is. In structured cabling, a cable run to a specific location is known as a data drop—and the most common question we get is: how much does a drop cost?

Data cabling is the physical network that connects your devices to the internet, your servers, and each other.
