

Red alarm light in the distribution box

Overview

Check the electrical load and ensure that the sensors do not exceed the 10 Amp maximum. Everything else is working great. In troubleshooting I removed all the fuses from the distributor just to see if the fuse lights would not illuminate red and get green power. Any. Green indicator window (OK): If you see a green indicator window, it means the surge protector is working normally and protecting your equipment from power surges. The Lynx Distributor measures the voltage over each fuse. I have tried disconnecting both the AC input. Alarm light is solid red on openreach box still, I reported this a month ago and sky replied with a text that the problem as been resolved but it has not, it is still showing red alarm light on openreach box and feel am not getting what I am paying for. What's this?

16 May 2024 11:21 AM - last. The Red Alarm LED is triggered when the switched negative is triggered on the '- Alarm' terminal. This is done via the software by either triggering an Alarm state in Smartthings or your chosen Hub, or by manually switching the Bell or Siren device you created in the Konnected App.
