

Which department is responsible for dismantling telecommunication towers

Overview

The Telecoms industry is fast-paced, and the growth of new communication technologies means that some sites have become outdated and are no longer needed. Our dedicated Decommissioning team manages such projects. Our Property Programme Manager, David Clarke, at. Sometimes, due to technology upgrades, urban expansion, lease issues, or cost inefficiencies, telecom operators must decommission — or shut down — certain tower sites. Sounds easy, right?

Just switch off and walk away?

Not quite. It's. Telecoms masts are increasingly becoming a barrier to redevelopment or urgent building works – and the legal framework for removing them is tightening, according to an expert at national law firm Clarke Willmott. It covers every stage from initial conception to final decommissioning. Outdated or redundant systems not only tie up resources but can also pose operational and compliance risks.

Article Content

Procedure For Hoisting and Dismantling Materials and Equipment

This document establishes the procedure for safely hoisting and dismantling equipment such as antennas and radios from telecommunications towers. It describes the responsibilities of the

Challenges and Solutions in Tower Site Decommissioning: What
